At a glance

IBM® i2 COPLINK Premium brings tactical lead generation to law enforcement. By enabling law enforcement officers to quickly identify investigative leads, IBM i2 COPLINK Premium helps law enforcement solve crimes faster, thereby helping to keep communities safer.

IBM i2 COPLINK Premium can help law enforcement officers:

- Discover investigative case leads quickly.
- Visualize and analyze data on maps and through time sequence playback.
- Discover hidden value in already existing data stores.
- Access multiple data stores through one system.
- Share data with other law enforcement organizations.
- Search with front-facing photos using facial recognition technology
- Search where and when needed, at the desk, in the car, or, where offered, with a mobile device.

IBM i2 COPLINK Premium is a secure, password-protected, and data-encrypted solution.

Overview

IBM i2 COPLINK Premium can help law enforcement organizations solve crimes faster, keep officers safer, and disrupt crime and terrorism by organizing and providing tactical, strategic, and command-level access to vast quantities of seemingly unrelated data.

IBM i2 COPLINK Premium is designed to assist law enforcement agencies in identifying investigative leads and solving crimes faster. Whether used by an officer in the field or a commander in the office, IBM i2 COPLINK Premium is the go-to information source for law enforcement as it currently supports one of the largest law enforcement information sharing initiatives in the world.

While IBM i2 COPLINK Premium comes with the enhanced functionality of IBM i2 COPLINK Detect, it can be tailored and enhanced with several additional modules to address each user's specific needs. IBM i2 COPLINK Detect provides IBM i2 COPLINK Premium's core capabilities, including a large COPLINK database that centralizes data from many sources. Users can generate single, six-pack, and nine-pack photo

line ups, save their search history, and organize their investigations in case folders so they can more easily generate reports on their investigations.

IBM i2 COPLINK Premium is designed to seamlessly scale from single data source deployments to regional information sharing initiatives tying multiple agencies and data sources together. It helps empower police departments, sheriff's departments, and intelligence agencies by putting valuable information in the hands of first responders, analysts, and commanders when and where they need it.

For ordering, contact your IBM representative or an IBM Business Partner. For more information contact the Americas Call Centers at 800-IBM-CALL (426-2255). Reference: SE001

Key prerequisites

IBM i2 COPLINK Premium runs on Microsoft™ Windows™ Server 2008 with Java™ 1.6, Oracle 11g or SQL Server 2008, Apache Tomcat 7, and .NET 4.0. For details, refer to the [Hardware requirements](#) and [Software requirements](#) sections.

Planned availability date

- May 8, 2012: Electronic delivery except for IBM i2 COPLINK File Exporter for COPLINK IEPD Premium and IBM i2 COPLINK Analysis Search Premium, which is June 15, 2012
- May 25, 2012: Physical delivery except for IBM i2 COPLINK File Exporter for COPLINK IEPD Premium and IBM i2 COPLINK Analysis Search Premium, which is June 26, 2012

Description

IBM i2 COPLINK Premium brings tactical lead generation to law enforcement. Its ability to quickly identify investigative leads by tying multiple agencies and data sources together makes it the go-to information source for law enforcement from commander to officer, from the desk to the field. It helps empower police departments, sheriff's offices, and intelligence agencies by putting valuable information in the hands of first responders, analysts, and commanders when and where they need it.

IBM i2 COPLINK Premium can help law enforcement officers quickly identify investigative leads by:

- Identifying leads with powerful search capabilities including association, partial information, geospatial, crime type and modus operandi (MO), and facial recognition searches
- Providing instant access to virtually all available information with a purpose-built, consolidated information repository
- Using consolidated views to quickly focus on information related to leads and suspects, even if the information is spread across multiple systems

IBM i2 COPLINK Premium comprises the following modules:

- **IBM i2 COPLINK Incident Analyzer Premium** visualizes geographic relationships among incidents and animates the progression of incidents over time using mapping, analytical, graphing, and charting tools.
- **IBM i2 COPLINK Visualizer Premium** helps accelerate and simplify investigations by visualizing relationships and associations. Visual layouts organize information to help users understand patterns in the data and to identify the most promising leads quickly.

- **IBM i2 COPLINK Face Match Premium** helps speeds the identification of potential suspects with sophisticated facial recognition capabilities. Face Match extends IBM i2 COPLINK Premium's core search capabilities to enable searches against booking photo databases using photos or composite sketches.
- **IBM i2 COPLINK Computer Statistics Premium** enables agencies to conduct effective CompStat analysis across all available data. A collection of GIS, statistical graphs, charting, and analytical tools work on the rich COPLINK database, allowing agencies to leverage their data to better allocate resources.
- **IBM i2 COPLINK Analysis Search Premium (CAS)** provides analysts with access to vital crime data held in COPLINK nodes from within IBM i2 Analyst's Notebook. By taking advantage of i2 Analysis Ready Search technology, analysts can simultaneously and comprehensively search COPLINK nodes and other data sources with the results automatically modeled and semantically enriched for immediate analysis. For information about IBM i2 Analyst's Notebook, refer to Software Announcement [212-110](#), dated May 1, 2012.
- **IBM i2 COPLINK Adaptive Analytic Architecture Premium (A3)** enables information sharing across regional and national information sharing initiatives by providing rapid, simultaneous searches across multiple COPLINK sites and external data sources. A3 technology automatically searches and consolidates results from multiple systems, speeding access to valuable information.
- **IBM i2 COPLINK Active Agent Premium** streamlines investigations by automating repetitive or periodic searches. Active Agent notifies users via email, pager, or system alert when new information is available or when others are conducting similar searches.
- **IBM i2 COPLINK Mobile Premium** helps ensure COPLINK users stay up to date while in the field by providing direct access to valuable data from mobile devices and PDAs. A streamlined user interface helps users access criminal history and booking photo data wherever their investigations take them.
- **IBM i2 COPLINK Dashboard Premium** monitors and visualizes incoming data from operational systems, such as computer aided dispatch (CAD) systems, to help agencies effectively deploy resources and enhance performance as events unfold and situations change.
- **IBM i2 COPLINK Intelligent Law Enforcement Actionable Data (Intel™ LEAD)** extends IBM i2 COPLINK Premium criminal history information management capabilities with the ability to enter and manage intelligence information in compliance with privacy regulations. With Intel LEAD, authorized users can simultaneously search and access law enforcement and intelligence data to see all available information.
- **IBM i2 COPLINK Activity Correlation Technology Premium (ACT)** identifies suspicious activities around critical infrastructure and monitored areas, even when incidents and data span multiple agencies and data sources. Unique algorithms monitor incoming information and alert analysts to potentially suspicious activities for further investigation.
- **IBM i2 COPLINK Inbound Connector for LEXS-SR Premium and IBM i2 COPLINK Outbound Connector for LEXS-SR Premium** are two connectors that utilize the Logical Entity eXchange Specification (LEXS), a National Information Exchange Model (NIEM) framework that uses a search and retrieval standard that is common within the US law enforcement community to enable real time query of and interoperability with third-party systems. One connector is for outbound connections and the other for inbound connections.
- **IBM i2 COPLINK File Exporter for COPLINK IEPD Premium and IBM i2 COPLINK File Exporter for N-DEx Premium** are two distinct XML export formats for COPLINK data. Once COPLINK File Exporter is installed and configured, the file extracts run automatically and in the background without the need for manual intervention.

Accessibility by people with disabilities

A US Section 508 Voluntary Product Accessibility Template (VPAT) containing details on accessibility compliance can be requested at

http://www.ibm.com/able/product_accessibility/index.html

Product positioning

IBM i2 COPLINK Premium is part of IBM Solutions for Smarter Cities™ to help reduce crime and security threats and ensure public safety. IBM solutions for Public Safety integrates repeatable, best practice patterns to help leaders:

- Leverage information via a unified view of disparate data to uncover fraud--protecting citizens, businesses, and government.
- Anticipate crime to increase deployment impact and reduce costs.
- Coordinate resources to identify and share investigative leads and help agencies solve crimes faster.

Education support

The IBM Software Training team offers a portfolio of education services to help customers and IBM Business Partners successfully deploy IBM i2 COPLINK Premium to achieve the maximum benefit. Education is a key component to ensuring software success.

The IBM curriculum provides a unique training value built on exclusive product knowledge direct from IBM developers cemented with expert instructors and flexible time and cost saving training options. The IBM Software Training team works closely with product developers and services organizations to ensure that the courses we offer provide the most up-to-the-minute technical and product information.

Our courses place an emphasis on the advanced knowledge and insight that only these sources can provide. IBM draws from a deep pool of technical experience in the development of our courses and passes that knowledge on to our students.

IBM Software Training provides training for the entire IBM software portfolio that spans the spectrum of skills needs from introductory product overviews to advanced offerings. Hands-on labs let you work with fully-functional versions of the software to round out your training experience. Several training options are available, including instructor-led classroom offerings, customized courses, and virtual (online) training that lets you train from your office.

For course descriptions, locations, and availability dates, visit

<http://www.ibm.com/training/>

Select "Training search - global" and search for "COPLINK" or call 800-IBM-TEACH (800-426-8322).

Technical information

Specified operating environment

Hardware requirements

Application server

- Processor: Two Xeon E5550
- Clock speed: 2.66 GHz
- Memory: 8 GB
- Hard drive: Two 146 GB 15K
- HDD Configuration: RAID-1

Migration server

- Processor: Two Xeon E5550
- Clock speed: 2.66 GHz
- Memory: 8 GB
- Hard drive: Two 146 GB 15K
- HDD Configuration: RAID-1

Face match server

- Processor: Two Xeon E5550
- Clock speed: 2.66 GHz
- Memory: 32 GB
- Hard drive: Two 146 GB 15K
- HDD Configuration: RAID-1

Database server

- Processor: Two Xeon E5550
- Clock speed: 2.66 GHz
- Memory: 8 GB
- Hard drive: Two 146 GB 15K
- HDD Configuration: RAID-1

Data storage (two required)

- Hard drive: 30 300 GB 15K dual HBA controllers, 9 TB usable
- HDD Configuration: RAID-50

Integration box (desktop)

- Processor: Intel Core 2 Duo E8400
- Clock speed: 3 GHz, 6M, 1333 MHz
- Memory: Two DIMMs 4 GB DDR2 non-ECC SDRAM, 800 MHz
- Hard drive: Two 160 GB 7200 RPM SATA 3.0 GB/s and 8 MB DataBurst
- HDD Configuration: RAID-1

General workstation

- Processor: Intel Celeron™
- Memory: 512 MB
- Hard drive: 80 GB
- Display: 1024 X 768

Computer Statistics workstation

- Processor: Intel i7 64 bit
- Memory: 4.00 GB
- Hard drive: 80 GB
- Display: 1024 X 768

Software requirements

IBM i2 COPLINK Premium requires the following:

- Oracle Java 1.6.30 64 bit
- Oracle 11g (11.2.0.1 Patch 8795792 with partitioning) or Microsoft SQL Server 2008 R2

Note: If non-English language data is to be stored, Oracle is a requirement. Microsoft SQL Server cannot be used. Contact your IBM representative or IBM business partner for information on supported languages.

- Apache Tomcat 7
- Microsoft Windows Server 2008 64 bit for servers, Microsoft Windows 7 for integration boxes, and Microsoft Windows XP for desktops
- Microsoft .NET 4.0

The following IBM programs are prerequisites for IBM i2 COPLINK Analysis Search Premium:

- IBM i2 Analyst's Notebook 8.9.1
- IBM i2 Information Exchange for Analysis Search for Analyst's Notebook 8.9.1
- IBM Installation Manager 1.5

Environmental Systems Research Institute's (Esri) ArcGIS Server is a prerequisite for the following components:

- IBM i2 COPLINK Activity Correlation Technology
- IBM i2 COPLINK Computer Statistics
- IBM i2 COPLINK Dashboard
- IBM i2 COPLINK Incident Analyzer

The program's specifications and specified operating environment information may be found in documentation accompanying the program, if available, such as a README file, or other information published by IBM , such as an announcement letter. Documentation and other program content may be supplied only in the English language.

Compatibility

COPLINK Premium 4.7 is compatible with the previous version via COPLINK distributed search queries.

Limitations

IBM i2 COPLINK Computer Statistics Premium is limited to 1.5 million documents viewable on a client machine with 1536 MB of memory.

Planning information

Installability

Software Subscription and Support (also referred to as Software Maintenance) is included with licenses purchased through Passport Advantage and Passport Advantage Express® . Product upgrades and technical support are provided by the Software Subscription and Support (Software Maintenance) offering as described in the Agreements. Product upgrades provide the latest versions and releases to entitled software, and technical support provides voice and electronic access to IBM support organizations, worldwide.

IBM includes one year of Software Subscription and Support (also referred to as Software Maintenance) with each program license acquired. The initial period of Software Subscription and Support (Software Maintenance) can be extended by the purchase of a renewal option, if available.

Packaging

The products detailed in this announcement will be available in both ESD and packaged formats.

Physical media is delivered on DVDs.

This program, when downloaded from a website, contains the applicable IBM license agreement and License Information, if appropriate, and will be presented for acceptance at the time of installation of the program. For future reference, the license and License Information will be stored in a directory such as LICENSE.TXT.

Security, auditability, and control

IBM i2 COPLINK Premium offers the following security and auditability features:

- Audit logs
- User logins and group security
- Data encryption
- LDAP and Active Directory

The customer is responsible for evaluation, selection, and implementation of security features, administrative procedures, and appropriate controls in application systems and communication facilities.

Software Services

IBM Software Services has the breadth, depth, and reach to manage your services needs. You can leverage the deep technical skills of our lab-based, software services team and the business consulting, project management, and infrastructure expertise of our IBM Global Services team. Also, we extend our IBM Software Services reach through IBM Business Partners to provide an extensive portfolio of capabilities. Together, we provide the global reach, intellectual capital, industry insight, and technology leadership to support a wide range of critical business needs.

To learn more about IBM Software Services or to contact a Software Services sales specialist, visit

<http://www.ibm.com/software/sw-services/>

Ordering information

This product is only available via Passport Advantage . It is not available as shrinkwrap.

These products may only be sold directly by IBM or by authorized IBM Business Partners for Software Value Plus.

For more information about IBM Software Value Plus, visit

https://www.ibm.com/partnerworld/wps/servlet/ContentHandler/svp_authorized_portfolio

To locate IBM Business Partners for Software Value Plus in your geography for a specific Software Value Plus portfolio, contact your IBM representative.

Charge metric

| Program name | Part number or PID number | Charge metric |
|------------------------|------------------------------|---------------------|
| IBM i2 COPLINK Premium | 5725-G42 | Per User Value Unit |

User Value Unit (UVU)

UVU is a unit of measure by which the program can be licensed. UVU Proofs of Entitlement are based on the number and type of users for the given program. Licensee must obtain sufficient entitlements for the number of UVUs required for licensee's environment as specified in the program specific table. The UVU entitlements are specific to the program and type of user and may not be exchanged, interchanged, or aggregated with UVU entitlements of another program or type of user. Refer to the program specific UVU table.

Value unit pricing

The pricing for IBM i2 COPLINK Premium is based on User Value Units (UVUs). The UVU scaling table is a step-tiered model, meaning that each quantity tier must be multiplied by the scaling factor for that tier, and the UVU quantity for each tier added together to calculate the total UVU quantity. Any fractional UVU totals are rounded up to the next whole number. UVU quantities must be calculated separately for each chargeable component. Your IBM representative can provide additional assistance in understanding the scaling process.

IBM i2 COPLINK Premium uses Value Unit Exhibit (VUE) table 103A:

| Tier level | Minimum count quantity | Maximum count quantity | UVU factor per quantity |
|------------|------------------------|------------------------|-------------------------|
| 1 | 1 | 20 | 1.00 |
| 2 | 21 | 50 | 0.83 |
| 3 | 51 | 100 | 0.80 |
| 4 | 101 | 250 | 0.76 |
| 5 | 251 | 500 | 0.60 |
| 6 | 501 | 1,000 | 0.50 |
| 7 | 1,001 | 5,000 | 0.47 |
| 8 | 5,001 | 10,000 | 0.40 |
| 9 | 10,001 | 25,000 | 0.36 |
| 10 | 25,001 | | 0.33 |

Calculating User Value Units

The users used for the purpose of UVU calculation is the total number of Authorized Users who are accessing the program. An Authorized User is a unique person who is given access to the Program. The Program may be installed on any number of computers or servers and each Authorized User may have simultaneous access to any number of instances of the Program at one time. Licensee must obtain separate, dedicated entitlements for each Authorized User given access to the Program in any manner directly or indirectly (for example: via a multiplexing program, device, or application server) through any means. An entitlement for an Authorized User is unique to that Authorized User and may not be shared, nor may it be reassigned other than for the permanent transfer of the Authorized User entitlement to another person.

Terms and conditions

The information provided in this announcement letter is for reference and convenience purposes only. The terms and conditions that govern any transaction with IBM are contained in the applicable contract documents such as the IBM International Program License Agreement, IBM International Passport Advantage Agreement, and the IBM Agreement for Acquisition of Software Maintenance.

This product is only available via Passport Advantage . It is not available as shrinkwrap.

Licensing

IBM International Program License Agreement including the License Information document and Proof of Entitlement (PoE) govern your use of the program. PoEs are required for all authorized use. Part number products only, offered outside of Passport Advantage , where applicable, are license only and do not include Software Maintenance.

This software license includes Software Subscription and Support (also referred to as Software Maintenance).

This program is licensed under the IBM Program License Agreement (IPLA) and the associated Agreement for Acquisition of Software Maintenance, which provide for support with ongoing access to releases and versions of the program. IBM includes one year of Software Subscription and Support (also referred to as Software Maintenance) with the initial license acquisition of each program acquired. The initial period of Software Subscription and Support (also referred to as Software Maintenance) can be extended by the purchase of a renewal option, if available. This program has a one-time license charge for use of the program and an annual renewable charge for the enhanced support that includes telephone assistance (voice support for defects during normal business hours), as well as access to updates, releases, and versions of the program as long as support is in effect.

License Information form number

| Product identifier | Product name | License Instruction ID |
|--------------------|-----------------------------|------------------------|
| 5725-G42 | IBM i2 COPLINK Premium V4.7 | L-KBRN-8QWS85 |

The program's License Information will be available for review on the IBM Software License Agreement website

<http://www.ibm.com/software/sla/sladb.nsf>

Limited warranty applies

Yes

Limited warranty

IBM warrants that when the program is used in the specified operating environment, it will conform to its specifications. The warranty applies only to the unmodified portion of the program. IBM does not warrant uninterrupted or error-free operation of the program or that IBM will correct all program defects. You are responsible for the results obtained from the use of the program.

IBM provides you with access to IBM databases containing information on known program defects, defect corrections, restrictions, and bypasses at no additional charge. For further information, consult the *IBM Software Support Handbook* found at

<http://www.ibm.com/support/handbook>

IBM will maintain this information for at least one year after the original licensee acquires the program (warranty period).

Money-back guarantee

If for any reason you are dissatisfied with the program and you are the original licensee, you may obtain a refund of the amount you paid for it, if within 30 days of your invoice date you return the program and its PoE to the party from whom you obtained it. If you downloaded the program, you may contact the party from whom you acquired it for instructions on how to obtain the refund.

For clarification, note that (1) for programs acquired under the IBM International Passport Advantage offering, this term applies only to your first acquisition of the program and (2) for programs acquired under any of IBM's On/Off Capacity on Demand (On/Off CoD) software offerings, this term does not apply since these offerings apply to programs already acquired and in use by you.

Volume orders (IVO)

No

Passport Advantage applies

Yes, and through the Passport Advantage website at

<http://www.ibm.com/software/passportadvantage>

Software Subscription and Support applies

Yes. Software Subscription and Support (also referred to as Software Maintenance) is included with licenses purchased through Passport Advantage and Passport Advantage Express. Product upgrades and Technical Support are provided by the Software Subscription and Support offering as described in the Agreements. Product upgrades provide the latest versions and releases to entitled software and

Technical Support provides voice and electronic access to IBM support organizations, worldwide.

IBM includes one year of Software Subscription and Support with each program license acquired. The initial period of Software Subscription and Support can be extended by the purchase of a renewal option, if available.

While your Software Subscription and Support is in effect, IBM provides you assistance for your routine, short duration installation and usage (how-to) questions, and code-related questions. IBM provides assistance via telephone and, if available, electronic access, only to your information systems (IS) technical support personnel during the normal business hours (published prime shift hours) of your IBM support center. (This assistance is not available to your end users.) IBM provides Severity 1 assistance 24 hours a day, 7 days a week. For additional details, consult your *IBM Software Support Handbook* at

<http://www.ibm.com/support/handbook>

Software Subscription and Support does not include assistance for the design and development of applications, your use of programs in other than their specified operating environment, or failures caused by products for which IBM is not responsible under the applicable agreements.

For additional information about the International Passport Advantage Agreement and the IBM International Passport Advantage Express Agreement, visit the Passport Advantage website at

<http://www.ibm.com/software/passportadvantage>

System i Software Maintenance applies

No

Variable charges apply

No

Educational allowance available

Not applicable.

Statement of good security practices

IT system security involves protecting systems and information through prevention, detection, and response to improper access from within and outside your enterprise. Improper access can result in information being altered destroyed or misappropriated or can result in misuse of your systems to attack others. Without a comprehensive approach to security, no IT system or product should be considered completely secure and no single product or security measure can be completely effective in preventing improper access. IBM systems and products are designed to be part of a comprehensive security approach, which will necessarily involve additional operational procedures, and may require other systems, products, or services to be most effective. IBM does not warrant that systems and products are immune from the malicious or illegal conduct of any party.

IBM Electronic Services

IBM has transformed its delivery of hardware and software support services to help you achieve higher system availability. Electronic Services is a web-enabled solution that offers an exclusive, no-additional-charge enhancement to the service and support available for IBM servers. These services are designed to provide the opportunity for greater system availability with faster problem resolution and preemptive monitoring. Electronic Services comprises two separate, but

complementary, elements: Electronic Services news page and Electronic Services Agent.

The Electronic Services news page is a single Internet entry point that replaces the multiple entry points traditionally used to access IBM Internet services and support. The news page enables you to gain easier access to IBM resources for assistance in resolving technical problems.

The Electronic Service Agent™ is no-additional-charge software that resides on your server. It monitors events and transmits system inventory information to IBM on a periodic, client-defined timetable. The Electronic Service Agent automatically reports hardware problems to IBM. Early knowledge about potential problems enables IBM to deliver proactive service that may result in higher system availability and performance. In addition, information collected through the Service Agent is made available to IBM service support representatives when they help answer your questions or diagnose problems. Installation and use of IBM Electronic Service Agent for problem reporting enables IBM to provide better support and service for your IBM server.

To learn how Electronic Services can work for you, visit

IBM Global Financing

IBM Global Financing offers competitive financing to credit-qualified customers to assist them in acquiring IT solutions. Offerings include financing for IT acquisition, including hardware, software, and services, from both IBM and other manufacturers or vendors. Offerings (for all customer segments: small, medium, and large enterprise), rates, terms, and availability can vary by country. Contact your local IBM Global Financing organization or visit

<http://www.ibm.com/financing>

IBM Global Financing offerings are provided through IBM Credit LLC in the United States, and other IBM subsidiaries and divisions worldwide to qualified commercial and government customers. Rates are based on a customer's credit rating, financing terms, offering type, equipment type, and options, and may vary by country. Other restrictions may apply. Rates and offerings are subject to change, extension, or withdrawal without notice.

Financing from IBM Global Financing helps you preserve cash and credit lines, enables more technology acquisition within current budget limits, permits accelerated implementation of economically attractive new technologies, offers payment and term flexibility, and can help match project costs to projected benefits. Financing is available worldwide for credit-qualified customers.

For more financing information, visit
